

Grounded in agriculture. Grown by intelligence.

Fusable helps ag professionals make smarter equipment, financing, and fleet decisions with tools tailored to the seasonality and complexity of agricultural work.

From Field to Fleet, Decisions Rooted in Data Grow Stronger Results

In agriculture, every decision—when to buy, how to price, what to keep—affects the harvest and the bottom line. Fusable delivers real-time insights and industry-standard valuations that help farmers, dealers, and lenders operate with clarity in an unpredictable market.

Rich, Reliable Data

UCC Filings, Dealer Feeds, OEM Specs, Auction Listings, Financing Trends, FMCSA & DOT Data, VIN/Model Year Decoding

Proven Tools, Built for Ag

IronGuides, IronHQ, IronSearch, EquipmentWatch, CAB, Price Digests, EDA

The Result

Make sharper decisions, drive stronger margins, and fuel smarter growth.

Ways Fusable Can Benefit You

Whether you're in the field, on the lot, or behind the desk—Fusable delivers the insight you need to move with confidence.

Farmers & Operators

Know true equipment value, reduce cost uncertainty, plan upgrades with confidence

Dealers

Move inventory faster, target the right buyers, centralize operations

Lenders

Verify collateral value, evaluate borrower behavior

Insurers

Assess vehicle risk, validate asset info quickly

Fusable solves the problems ag people face

You Can't Manage What You Can't Value

Whether you're trading in a tractor or financing a sprayer, knowing what your equipment is worth is non-negotiable. IronGuides provides fast, reliable used equipment valuations backed by real-world dealer data, helping both farmers and dealers make smart, profitable decisions.

Guessing on When to Sell or Upgrade Can Cost You

EquipmentWatch FMV & FLV tools track real-time value trends so you can time trades, upgrades, or auctions wisely.

Dealers Need to Know What's Moving—And Where

EDA shows which brands and machine types are being financed by region — so you can stock inventory that aligns with real buyer demand.

Running a Business Shouldn't Require Ten Different Systems

IronHQ is a cloud-based CRM and inventory platform built for ag dealerships, streamlining everything from quoting to program participation.

Your On-Road Risk Could Be Invisible

If your operation includes trucks or delivery vehicles, hidden safety risks could be raising your insurance rates. CAB reports give visibility into crash history, inspection records, and violations—helping you stay compliant and lower your premiums.
