

Seamless data. Smarter decisions.

Fusable APIs and integrations deliver reliable data where you need it most, inside your existing systems and workflows. With easy-to-deploy connections, your team gains the insights they rely on without leaving their day-to-day tools.

The Fusable Solution

Tap into the same trusted data that power Fusable's industry leading products, from inspections and violations to valuations, market share and buyer intent.

Rich Reliable Data

UCC filings, ownership records, asset valuations, and carrier safety data

Proven Tools for Vital Industries

Fusable API, Iron API, EquipmentWatch API, CAB API, Price Digests API, Salesforce, Voze, Arcadium

The Result

Trusted data that empowers your team to make confident based decisions in the systems they already use.

Ways Fusable Integrations Can Benefit You

Faster Workflows

Automate manual research with data at your fingertips

Smarter Analysis

Push trusted data into your existing CRM

Better Sales Enablement

Give your team a 360-degree view of prospects, right where they sell

Ultimate Flexibility

Integrate once, use Fusable insights anywhere

Available APIs and Integrations

Fusable API

Integrate real-time prospecting data directly into your business systems to research companies, enrich records, and build smarter campaigns.

EquipmentWatch API

Delivers real-time integration into your internal systems, powering instant access to FMV, FLV, ownership and operating costs, and specs across more than 20,000 models.

Price Digests API

Access up-to-the-minute data and intelligence on VINs, vehicle specifications, and risk mitigation straight from your everyday business systems. That includes our advanced API tool, TruckBody IQ®, which captures the full value of a completed commercial truck cab, chassis, and body.

Fusable Salesforce App Integration

The Fusable Salesforce App embeds our verified prospecting insights directly into your Salesforce or Anvil instance, so your team can research companies, build prospecting lists, and take action without ever switching platforms.

Iron API

Integrate Iron API to streamline dealer appraisals, accelerate lender approvals, and give manufacturers real-time insights for pricing and lease strategies.

CAB API

Scalable integration for insurers and brokers who want CAB data inside their existing systems. It supports real-time access to inspections, fleet validation, TruckerCloud telematics, and more.

Voze Integration

Integrate key customer and prospect insights, including vehicle counts and brand preferences to lease ratios — directly into your workflow, helping you identify opportunities and focus on high-potential leads.

Arcadium Integration

Key customer and prospect insights, including vehicle counts, model age, brand preferences, and lease ratios, helping dealers uncover opportunities and make informed decisions.
