

Precision in valuation. Power in planning.

Iron Solutions is the go-to resource for accurate ag equipment valuations, market visibility, and dealership operations management. Trusted by dealers, lenders, and appraisers for over 80 years, Iron Solutions delivers data-backed confidence across the equipment lifecycle—from acquisition to resale.

Who uses Iron Solutions?

Equipment Dealers

Recommended Products: IronGuides + IronHQ

With IronGuides, you can accurately value trade-ins with up-to-date retail, wholesale, auction, and list pricing, then price to move with market-aligned data while tracking valuations over time to protect and grow margins. IronHQ streamlines inventory, sales, and customer relationship management, giving you one connected platform to run your dealership more efficiently.

Lenders & Appraisers

Recommended Product: IronGuides + PrecisionHQ

For lenders and appraisers, IronGuides delivers fair market values based on dealer-reported transaction data. Perform accurate and auditable equipment appraisals using robust comparables, while verifying model specifications, configurations, and year with precise VIN decoding and subtype-level data.

Ag Retailers & Co-Ops

Recommended Product: IronHQ

IronHQ provides centralized monitoring of equipment inventory across locations and departments. Manage customer records, pricing history, and deals with intuitive CRM-style features, while leveraging valuation data to make informed decisions on leases, trade-ins, and financing options.

Serial Number Handbook

Provides easy & convenient look-up of serial number listings and locations revealing where to find serial numbers on equipment. It identifies equipment model year by serial number for:

- 1928-2023 model years
- 4,886 models
- 57 manufacturers
- 13 types of equipment
- 28,120 serial numbers
- 90+ year span
