# RigDig

Truck history reports help make smart purchasing decisions.

Every truck has a story to tell. It could have a junk title, a history of poor maintenance or even been involved in an accident. With data from the most credible and reliable resources available, protect yourself using vital intelligence in an easy-to-read report.

The RigDig Solution

RigDig truck history reports are powered by the most comprehensive and trusted information sources available.

RigDig

The primary source for vehicle specs, RigDig provides all the labor & resources to tie a VIN to the associated carrier.

EDA

RigDig's primary source of Uniform Commercial Code (UCC) related liens and terminations.

AutoData Direct, Inc.

Integrated information from junk & salvage yards, insurance carriers, state titling agencies, & more from the National Motor Vehicle Title Information System.

FMCSA

Provides federally recorded accidents, post-accident inspections, inspection violations & carrier information.

NHTSA

Our source for manufacturer recall notices including the date of recall and component recalled.

A RigDig truck history report tells you:

Reported accidents

Reported inspection violations

Title & odometer brands

Reported insurance claims

Carrier/ Owner History

and more!
