

CONTRACTORS

Built for contractors. Backed by data.

Fusable delivers the intelligence construction contractors need to control costs, protect margins, and make smart, data-backed decisions across the equipment lifecycle from estimating and bid day to jobsite performance and resale.

From Bid to Breakdown, Smarter Decisions Start With Better Data

Whether you're building estimates, comparing rent vs. buy, defending equipment charges, planning fleet replacement, or tracking market conditions, Fusable equips your team with the tools to act decisively with confidence in the numbers behind every decision.

Data Sources

Auction & Market Listings, Dealer & Rental Data, OEM Specs & Dealer Feeds, Industry & Public Data Feeds, Telematics & Usage Signals

Solutions Engine

EquipmentWatch, Iron Solutions

The Result

Unmatched visibility into equipment values, costs, usage signals, and market activity — so contractors can make profitable decisions faster and reduce risk across every project.

Contractors & Fleet Owners Use Fusable to:

Bid with confidence using trusted equipment cost recovery benchmarks

Buy and sell at the right time using current FMV/FLV values and market trends

Defend equipment charges with reimbursement rates that hold up under scrutiny

Plan fleet replacement with clearer insights into depreciation, optimal resale timing, and lifecycle investment

Make smarter rent vs. buy decisions based on real rental rates and true cost-to-own data

Fusable solves the problems construction contractors face

Bids That Miss the Mark

Build estimates using trusted cost recovery data and real-world rental benchmarks not assumptions or outdated spreadsheets. Fusable helps ensure equipment costs are accurate, defensible, and aligned with current market conditions, so bids reflect reality and protect margins from the start.

Inconsistent Equipment Costing Across Jobs

Eliminate variation in how equipment is priced across projects, crews, and estimators. Fusable standardizes equipment costing from bid day through job closeout, creating consistency your team can rely on and documentation you can stand behind when questions arise.

Rent Vs. Buy Decisions That Drain Profit

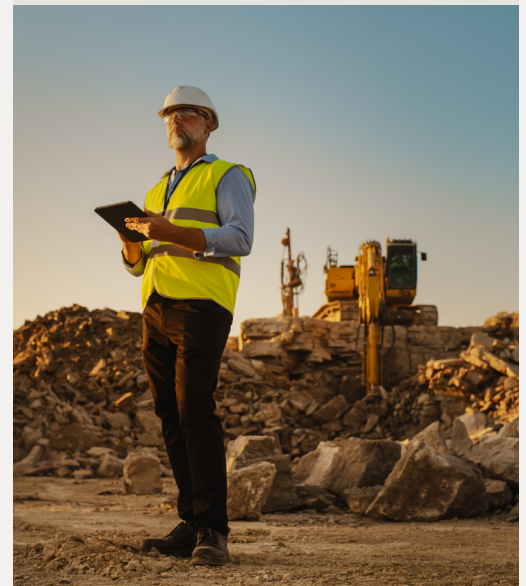

Too often, rental decisions are made without understanding the full financial impact. Fusable enables side-by-side comparisons of real rental rates and true cost-to-own data, helping contractors choose the most profitable option based on duration, utilization, and project demands.

Unclear Equipment Values At Trade-In Or Resale

When equipment values aren't grounded in current market data, contractors risk overpaying or underselling. With up-to-date FMV and FLV benchmarks, auction insights, and market trends, Fusable helps you time disposals, negotiate trade-ins, and maximize resale value with confidence.
