

# Expanded fleet location intelligence.

Growth depends on targeting the right facilities within the right fleets. With the RigDig locations data enhancement, Prospect Profiles now include branch locations, terminal facilities, and corporate parent insights. The result is clearer fleet visibility so you can target smarter, move faster, and drive more business.

## The RigDig Locations Tab

The locations tab brings expanded fleet intelligence into your existing workflow and keeps your prospect research centralized in one place.

Located inside each Prospect Profile, this tab helps you evaluate fleet scale, geographic distribution, and ownership structure with greater clarity. Territory planning, account prioritization, and outreach decisions can now reflect the full scope of a fleet's operations.

### Branch and Terminal Visibility

See facilities tied to a fleet beyond headquarters, including yards, terminals, and related business entities.

### Interactive Map and List Views

Visualize geographic concentration on a dynamic map or switch to a sortable table for structured review and deeper facility details.

### Corporate Parent Insights

Understand parent company relationships and related entities to better evaluate true fleet size and structure.

### Expanded Account Context

Instantly view total number of related locations, employee counts, building types, and facility descriptions where available.

## The Result

Greater clarity into fleet operations

Stronger territory alignment

More accurate account sizing

Better-informed sales conversations

Competitive edge built on complete data

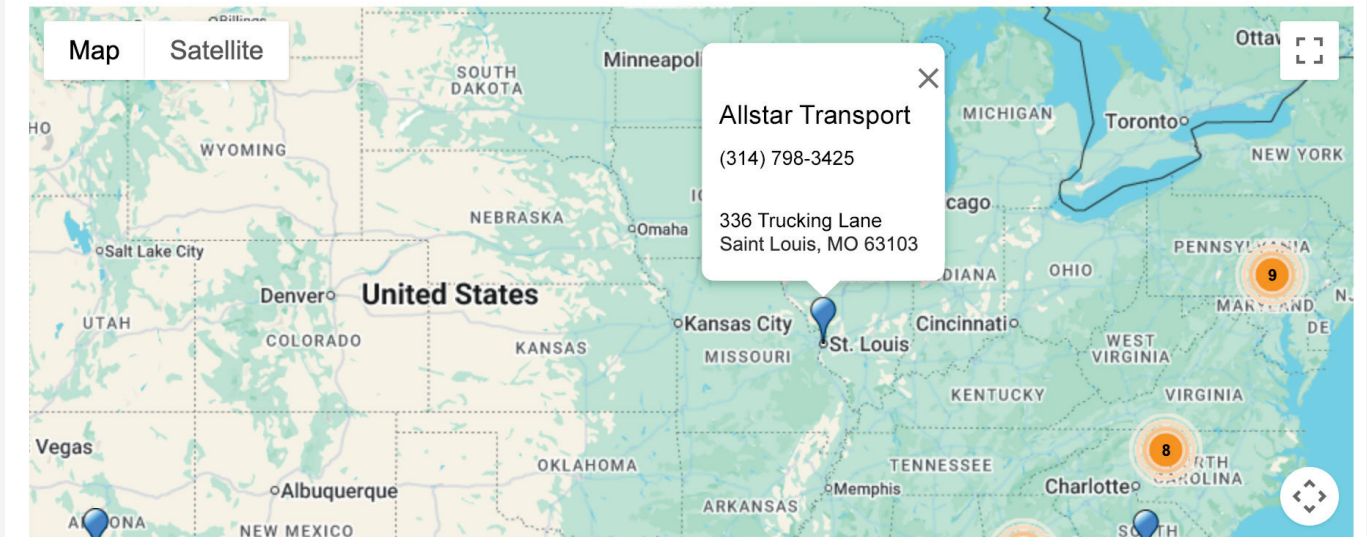

## Locations Map View

The location map visualizes branch and terminal locations on an interactive map inside RigDig.
