

POWERED BY TRUCKERCLOUD

Introducing telematics

Thanks to the convenience of our integrated telematics data, underwriters can now get the additive context of a fleet's operations and behavior alongside their safety data.

Our telematics data allows you to:

- Minimize leakage using granular data to identify variables not reported to the insurer.
- Uncover fleet behavioral data with TruckerCloud's proprietary scoring systems and provide underwriters with unparalleled risk assessments.
- Decrease time to First Notice of Loss (FNOL) through fleets shared camera data, alerting insurers of potential crashes within minutes of a crash event occurring.

Get detailed insights on your insured

Get minute-by-minute data showing where your insured is, what they're operating, and how they're driving.

Operational insights

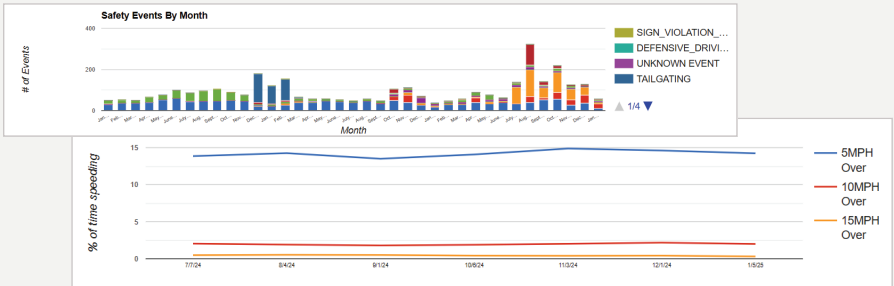

- Insured's travel routes
- Monthly mileage
- Enhanced Hot Zones to monitor problematic routes
- Miles driven in high risk areas

Utilization insights

- VIN schedule auditing
- Active drivers
- Types of trucks your insured is driving
- Truck values, based on Price Digests data

Behavioral insights

- Harsh events
- Distracted driving
- Mobile usage
- Safety belt usage
- Tailgating
- Speeding
